March 18, 2024

Dear families,

Today we received some news that **2A Sacred Heart** is in a Gastrointestinal (GI) outbreak. All residents who are exhibiting symptoms have been isolated and symptoms are being monitored. We have initiated outbreak measures on the unit to prevent spread of the virus to the other residents within the home. This means that residents need to stay on the unit with family visits occurring on the unit.

Unfortunately, **2C St. Mary's/St. Francis unit** continues in a Gastrointestinal (GI) outbreak, but we are hoping to resolve soon. The COVID outbreak continues on **3C St. John's/St. Paul's unit** and will likely be resolved sometime this week if no other residents become symptomatic.

Lastly, the **3A St. Anne's unit** continues in a scabies outbreak. All residents received treatment last week and we will do a second dose of treatment and cleaning on March 27/28.

We continue to follow outbreak measures on all of the above units which include:

- daily screening of residents for symptoms
- initiate Isolation Precautions for anyone demonstrating symptoms
- Only small group activities that allow for physical distancing between residents on the resident care unit
- Ensure physical distancing during meals
- Ensure hand hygiene by the residents is done before and after meals and activities
- All residents to remain on the unit (no hairdressing or off unit events)
- Visitation is to occur in the resident care rooms on the unit only

Please keep our residents in your prayers as we navigate through these continued outbreaks.

Sincerely,

Stacey Morgan RNBN

Director of Care

To Serve is to Love
